

Glass Polishing Machine TD 1000

Glass Polishing Machine TD 500

Made in Germany

TECHNICAL DATA

	TD 1000	TD 500
LxWxH	60,5 x 27,5 x 47 cm	26 x 38 x 47 cm
	30 kg	20 kg
	1270 W	690 W

YOUR ADVANTAGES AT A GLANCE

- ▶ enormous time and labour savings
- ▶ easy handling
- ▶ polishing 2 glasses at the same time (TD 1000)
- ▶ reduction of glass breakages
- ▶ can be used for all sorts of glass
- ▶ washable polishing brushes in different sizes
- ▶ An included laundry bag allows cleaning in the washing machine

Glass Polishing Machine TD 1000

Glass Polishing Machine TD 500

Polished glasses

The simple function of the Glass Polishing Machines TD 500 and TD 1000

Put the washed and humid glasses with slightly rotary up- and downward moves over the polishing brushes. The fine brushes dry and polish 1 -2 glasses at the same time. Water stains, reams, limescales, mineral rests etc. are removed. The polished glasses shine in mirror finish.

An installed heating prevents that the polishing brushes become too wet and leave reams on the glasses.

When your glasses are already dry before you start to polish them, we recommend to use the optional steam station.

Cleaning of the brushes:

The brushes are cleaned with max. 40°C hot water and a slight detergent. Please do not use aggressive washing-up liquids or bleaches. After the cleaning the brushes should be dried at first with a clean cloth. Finally, you put the brushes on the glass polishing machine and let them dry by the machine on the highest temperature level.
