- ▶ **clean and hygienic**
the cutlery looks like new and is sterilized by an UVC-lamp
- ▶ **cost-saving and economic**
low operating expenses and cost-savings due to the gain of the time
- ▶ **solid and durable**
high-grade materials and a solid construction
- ▶ **user-friendly and low-maintenance**
simple and safe handling due to the well-thought-out design
- ▶ **service-orientated and guaranteed**
as manufacturer we offer spare parts-guarantee and service

The clean and wet cutlery is given directly into the TD 3000 L.

The cutlery is spirally transported upwards through a high-grade sterile granulate and is dried and polished. The installed ventilator prevents that granulate comes out of the machine.

The regular use of TD 3000 L keeps your cutlery shining.

The simple operation of TD 3000 L

Whether chromium, stainless steel or even high-grade silver – the clean and wet cutlery is given directly from the dishwasher into the cutlery polishing machine TD 3000 L.

Via the internal vibrating conveyor it is spirally transported upwards through a high-grade granular substance. This purely natural product dries and polishes your cutlery and keeps it shining – with just a single run. The granulate has to be exchanged every 4 – 8 weeks depending on the frequency the machine is used. The machine operates very quietly due to a special spring system.

Your cutlery will not only pass the inspection by your guests, it even meets the strict EU-Hygienic Guidelines: a special UVC-lamp sterilizes both, the cutlery and the granulate.

The constant use of the TD 3000 L reduces the oxidation of cutlery in a remarkable way and makes it look noticeably better. As manufacturer we offer you a 10-years spare parts-guarantee and service.

Special technical features

- ▶ low priced model for first-time users
- ▶ space saving
- ▶ ventilator for perfect shine

Option – mobile underframe TD 3000 L
52 x 67 x 36,5 cm (L x W x H)
